

Modernize the applications that power your business

Achieve efficiency, productivity, and cost reduction by modernizing your Windows, SQL, or .NET applications. Whether running on-premises or already in the cloud, Amazon Web Services (AWS) native and purpose-built services help you modernize your Microsoft workloads on AWS quickly and efficiently. With AWS, you no longer spend time and effort worrying about preserving legacy technologies and operational inconsistencies. Remove the burden of hardware refreshes and the limitations of long-term licensing agreements by modernizing your Microsoft workloads on AWS. No matter where you are in your modernization journey, AWS can help transform your existing applications and infrastructure to extend into cloud-native services that unlock new business capabilities, accelerate innovation, and reduce costs.
